PERSONAL PROJECTS

Leave Management System (04/2022 - 05/2022)

- Build using Angular as frontend and SQL, Java for backend. In this Webapp I add all CRUD operations like create, delete, update, employee and apply for leave which will be approved by the person whom you are assigned too and only he can approve your leave like functions

mPlacementTracker (08/2021 - 12/2021)

- Building a mobile app using flutter and firebase for placement drive which are happening these days in the colleges. To help placement drive to connect to the student and send details about the companies to the student using this app.

Network-based Brainstorming System (08/2020 - 11/2020)

- Build a Network-based Brainstorming System using spring-boot and maven in which people can vote and create meeting schedule and upload their ideas and also can chat with other team members.
